

# SHEET SET

## Flex

The Flex Sheet has been specifically engineered to complement pressurecare mattresses including static foam, hybrid and alternating air systems. Traditional fitted sheets can restrict immersion and increase surface tension, reducing the mattress' pressure redistribution capability.

**Style: Jersey Stretch**

**Composition: 95% Bio-Comb Cotton, 5% Lycra**

**Fabric Weight: 220gsm**

**Fitted Sheet Drop: 400mm**

**SKU: ICFS**

**Colour Options:**

ICFS

## Key Features

- **Preserves Pressurecare Performance**
  - Designed for static foam, hybrid and alternating air mattresses.
- **4-Way Super Stretch**
  - 5% Lycra woven into 220gsm jersey knit reduces surface tension and 'hammocking'.
- **Anti-Shear Properties**
  - Fabric moves with the patient to reduce drag and support skin integrity.
- **Enhances Mobility in Bed**
  - Supports easier repositioning and independent movement.
- **95% Bio-Comb Cotton**
  - Soft hand feel, durability, reduced pilling, breathable comfort.
- **Moisture Wicking & Breathable**
  - Supports microclimate and skin health.
- **220gsm Jersey Construction**
  - Durable yet breathable.
- **Adjustable Bed Compatible**
  - Maintains fit during profiling and elevation.
- **Clean White**
  - Supports infection control and easy inspection.
