

VFIT SEATING SYSTEMS

The VFit range is a modular medical chair range that offers customisable comfort with removable components, adjustable features, and innovative support technologies. It is perfect for both in-home and facility use.

EASY TRANSFER

VERSATILE APPLICATIONS

VFIT ARMS

- Removable pocket and cover
- Removable arm top and can be non-fixed for positioning.
- Removable sides with handle for easy transfers or hoists, left and right (note: handles can be used for repositioning in chair).

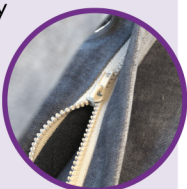

VFIT SEAT

- Can be positioned horizontally. Cover removable for washing.
- Can place foam seat wedge and small cushions for extra pressure relief and support.
- High quality pocket wrapped springs for independent pressure responsiveness.

VFIT LOWER BACK AND LEGS

- Lower back support has a removable washable cover.
- With unique infill cushion filled with extremely fine microfibre, this can be customised not only with fill amounts but can be molded to unique shapes and contours to suit the user.
- Hand control pocket in cover.
- Lower back support can be unzipped and positioned vertically or rotated to suit user.
- A fold down foot rest allows users to be moved easily.

KEY FUNCTIONS

Back & Leg Adjust

Sit to Stand Adjust

VFIT UPPER BACK

- Upper back support can be removed and cover is removable and washable.
- This support can be adjusted vertically from original position to suit user height.
- Featuring BendX technology, this support can be adjusted forward and back to position user in correct position. This is extremely beneficial for head support when using the VFit System in supine position.
