

ICARE PARTNER BEDS

keeping people together

No gap between the mattresses

Fully upholstered surround

Separate headboards

Compatible with all side rails and accessories

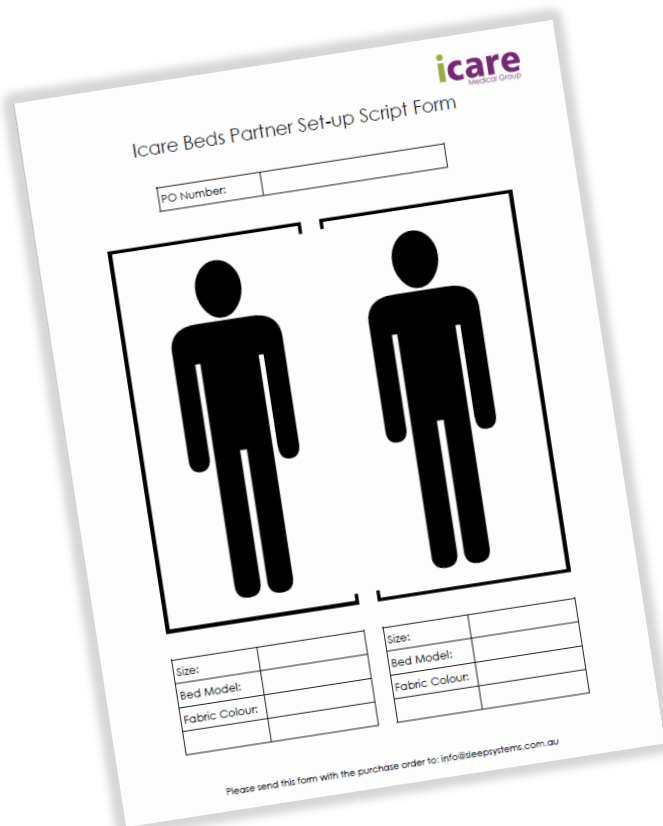

icare

SIDE x SIDE CONFIGURATIONS

All Icare Beds can be made for couples to sleep side by side with no gap between mattresses. You simply choose in 3 steps.

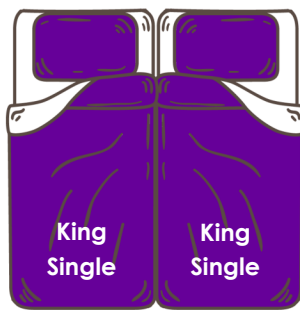

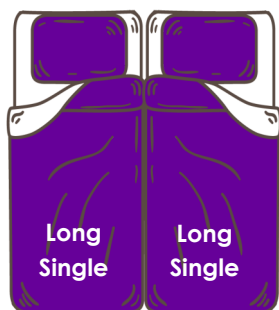

1. Choose which model each partner wants.
2. Choose the bed size (half queen, long single or king single)
3. Choose which side each partner will be sleeping on. This can be filled out on the Icare Partner Diagram form (see across page)

Note: Headboards are sold as a separate item and only can be sold to fit each side. You cannot get a one piece headboard for Partner bed configurations.

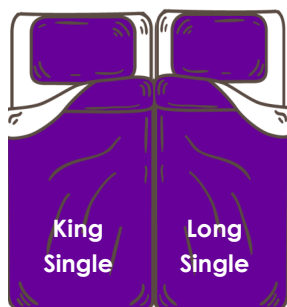

The form is titled "icare Medical Group" and "Icare Beds Partner Set-up Script Form". It includes a "PO Number:" field. Below this is a diagram showing two human figures side-by-side, representing the bed configuration. At the bottom, there are two sets of fields for "Size:", "Bed Model:", and "Fabric Colour:". A footer note says "Please send this form with the purchase order to: info@sleepsystems.com.au".

SIDE x SIDE SIZE CONFIGURATIONS:

Note: This makes a super king size bed
