

HYDROSENSE

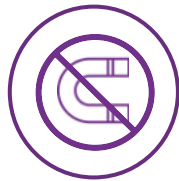

HydroSense

The Icare HydroSense is a range of unique products designed to manage and maintain a comfortable temperature. Heat sensitivity is a common issue caused by disease or immobility including multiple sclerosis, diabetes, kidney disease, reduced mobility, inflammation and climate.

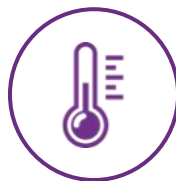

80 Watts

Uses less electricity than a light bulb

Free from Magnetic Fields

No electro-magnetic fields.

Large Temperature Range

Cools to 8°C and heats to 48°C

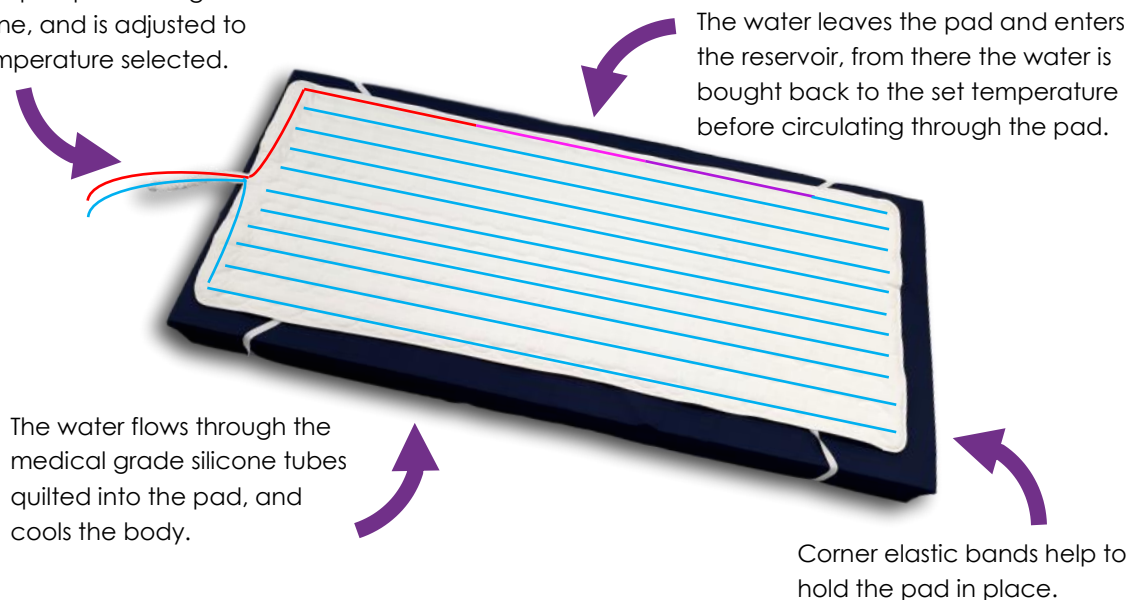

Quiet Operation

Whisper quiet motor function

How they work

Water is pumped through the machine, and is adjusted to the temperature selected.

The water leaves the pad and enters the reservoir, from there the water is brought back to the set temperature before circulating through the pad.

The machine has night settings and a built in timer, to prevent chills. The settings can be changed using the touch screen control panel.
